Problem Solving, Team Collaboration, Communication, Planning

PROJECTS

Website Security Scanner, *Technologies: Python, HTML, CSS, JavaScript, Fast API, MySQL*

- Developed a web-based security scanner to detect common website vulnerabilities.
- Implemented security checks for SQL Injection, Cross-Site Scripting (XSS), and insecure HTTP headers.
- Generated detailed security reports with vulnerability descriptions and recommended fixes.
- Designed a user-friendly interface for scanning websites and viewing security analysis results.

Virtual Voice Assistant, *Technologies: HTML, CSS, JavaScript, PHP, MySQL, XAMPP*

- Developed a voice-controlled virtual assistant capable of responding to user commands.
- Implemented secure authentication with login and registration functionality.
- Integrated frontend and backend technologies for seamless user interaction.
